

```
unsigned long z = 0;
```

```
void setup(){
```

```
}
```

```
void loop (){
```

```
while (z < 250000 ){
```

```
z++;
```

```
        /////      code
```

```
        ///        EEPROM write
```

```
}
```

```
        ///        EEPROM Read
```

```
        ///        EEPROM print
```

```
}
```
